

MEET LSP^{OWER}

LS Power Grid Maine, an affiliate of LS Power, will develop, engineer, construct, own and operate the **Aroostook Renewable Gateway Project**, a new 345 kV transmission line that will connect renewable energy from Aroostook County to Maine and New England.

680+ Miles
Long-distance, high-voltage transmission infrastructure in the U.S.

\$50+ billion
Capital raised to finance and support investments in energy

\$2+ billion
High voltage transmission placed into operations since 2013

Power generation and transmission company

\$3+ billion
High voltage transmission in permitting or construction

CAISO, ERCOT, MISO, NYISO, PJM, ISO-NE

680 miles of high-voltage transmission completed.
200+ miles and multiple substations under construction.
